

## Cold Steel

Workers today installed steel girders in the construction of the commercial/residential development at 1135 Post Road East, the former site of Geiger's Garden Center, which closed in March 2015. According to Coastal Construction site chief project manager Brian Steinhauser, the structure pictured will be a one-story garage with 18 parking spaces. It will be adjacent to four town houses comprised of 12 residential units, two of which are deemed as affordable housing rentals. Another building in the development complex will house a branch of First County Bank. (CLICK TO ENLARGE) *Dave Matlow for WestportNow.com*
